

Opioid Risk Tool

Mark each box that applies

1. Has a professional ever diagnosed you with attention-deficit hyperactivity disorder, obsessive compulsive disorder, bipolar disorder or schizophrenia?
2. Has a professional ever diagnosed you with depression?
3. Does anyone in your family suffer from problems with alcohol?
4. Does anyone in your family suffer from use of illegal drugs?
5. Does anyone in your family suffer from abuse of prescription drugs?
6. Prior to adolescence, have you had sexual experiences with another who was either physically or psychologically stronger than you?
7. Has your consumption of alcohol ever resulted in negative effects (relationships, driving offenses, physical health)?
8. Have you consumed illegal drugs in the past?
9. Have you consumed prescription pain drugs in order to achieve a mood effect, or sourced prescription drugs from others?
